Opti-Luxx

THE BRIGHTEST & BEST LED LIGHTS.

The Opti-Luxx Story begins over twenty years ago, when we pioneered the use of LED lighting technology in commercial vehicle applications by developing the first LED school bus lights, making sure our kids had the safest transportation possible. From there, we expanded that same technology to deliver safety and performance for commercial fleets — with the **brightest and best** lighting to illuminate dark work environments and cut through the visual clutter on roadways to **command visual attention**.

We take very seriously, our core value that **Seeing IS Safety**. We ensure our lighting products fulfill the safety and market needs of people and businesses in our community and beyond. We provide our customers the best in product development, application engineering, program management and launch support for new and existing products. Our lighting portfolio considers all sides of the vehicle, forming a 360-degree shield of bright and dependable lighting protection for all roadway scenarios.

As we continue to develop new products and innovate new ways to command visual attention for commercial vehicles, we are proud to be the leading full-service supplier of LED commercial vehicle lighting. The products you receive from Opti-Luxx will meet or exceed your expectations for quality and delivery — **today, and down the road**.
